

# On-line Basecoding.....

*With the Travtec Diverter II*

**Inkjet on to the base of bottles, jars & cans with the Diverter!**

The Diverter II is designed to mount to existing conveying lines for basecoding with a continuous inkjet printer or laser. Used where it is inconvenient to create a gap in the line, it is easily attached to most conveyors up to 150mm wide.

Adjustment between container sizes takes only seconds, and the twin side-belt synchronised drives ensure positive container control and guidance.

Manufactured mainly in stainless steel, the Diverter is suitable for most environments.

## **TECHNICAL SPECIFICATION:**

<b>Construction:</b>	<i>Stainless steel. Quick-change design. CE Certified</i>
<b>Controls:</b>	<i>Motor speed control in enclosure with heavy duty synchronised drives.</i>
<b>Power Required:</b>	<i>220/240 v AC Single phase. 0.5 kW loading.</i>
<b>Speed:</b>	<i>Variable up to 100 mtrs per minute.</i>
<b>Product Sizes:</b>	<i>Diameter: 20 –150mm; Height: 400mm.</i>
<b>Dimensions:</b>	<i>Length: 596mm; Width: 575mm; Height: 350mm.</i>

**Protected under patent numbers: 2222111, 5207155**
