

Code Control

Designed to assure quality standards are met in pharmaceutical packaging lines, **LIXIS CodePro** offers reliability and accuracy for 1D and 2D barcode inspection. It stands out for its versatility for barcode verification as well as for its specially designed friendly and easy to use software.

Following LIXIS high quality standards, CodePro equipments meets every specific need in pharmaceutical industry.

Integration

- › Designed for installation on cartoners, leaflet folders, labeling machines, blistering machines, carton codifiers, and tube fillers among others.
- › Wide range of 1D and 2D pharmaceutical barcode verification such as: *PharmaCode, EAN, Datamatrix, 128 Barcode, 93 Barcode, 39 Barcode and RSS.*

Features

- › Reliable, fast and accurate 1D and 2D barcode reading.
- › Allows connection for up to 4 simultaneous readers.
- › Independent industrial controller (PLC) included for system security watchdog, rejection control and shift register.
- › Practically unlimited product storage memory.
- › USB Connection allowing reports exportation and products backup.

Quality Assurance

- › Automatically verifies 100% of the production preventing any kind of human mistakes.
- › Biometric user identification through fingerprint recognition optionally available.
- › Designed under cGMP guidelines to assure integration with pharmaceutical working environment.
- › Immediate system recovery to original factory settings by means of included USB device.

Simplicity

- › Easy to Use, friendly LIXIS® software interface with on-screen Help and Interactive Tutorial. Product setup in 4 easy self-learning steps. Fast and efficient product setup and load.
- › Step by step new product configuration wizard aided by LIXIS Virtual Assistant® Voice Guide.
- › TouchScreen color interface.

Code Control

Technical Data

Operational Aids:

- › Step by Step new product setup wizard.
- › On-screen system documentation.
- › LIXIS® Virtual Voice Assist Guide.

Hardware:

- › Industrial Processor unit.
- › 7" Color TFT LCD with Touchscreen.
- › Industrial PLC included.
- › Fingerprint scanning sensor for biometric user id validation.

Capacity:

- › Up to 4 simultaneous readers.
- › Barcode Scanner / CCD readers.

Reports:

- › Detailed exportable production reports with batch statistics for subsequent analysis.

Languages:

- › English, Spanish, Portuguese, German, Russian and French.
- › Others available under request.

Connectivity:

- › USB connection for production reports exportation.
- › Ethernet connection for remote support.

Software

- › LIXIS® Software for 1D and 2D barcode verification.

Housing:

- › Stainless Steel housing.
- › Designed under cGMP regulations.

Due to technological evolution, specifications are subject to change without previous notification.
