

Pharma Coding & Serialisation Off-Line

TR-860 Versa-Feeder

The TR-860 Versa-Feeder is designed to feed flat cartons, folded leaflets, single labels and paper sheets for coding with inkjet or laser, labelling, or print & apply. An OCR/OCV vision system positioned directly after the printhead, confirms & collects the coded data for traceability purposes. A fail to safety reject unit removes incorrectly, or unprinted cartons, and an optional Shingling Conveyor ensures a continual feed for maximum production efficiency

The machine is ideal as an off-line Serialisation System reducing complexity where cost are a major factor against on-line systems. It is designed to accept most types of high resolution printers and suitable vision systems.

TECHNICAL SPECIFICATION:

Construction:	<i>Stainless steel framework. Heavy duty drives, Quick-change design. CE Certified</i>
Controls:	<i>PLC controller. With HMI operator interface, intermittent & continuous feed. Batch counter.</i>
Power Required:	<i>220/240 v AC Single phase. 1.5 kW loading.</i>
Throughput:	<i>Up to 120 products per minute depending on size.</i>
Carton Sizes:	<i>Length: 75 - 400mm; Width: 35 - 350mm; Thickness: 0.1– 10mm.</i>
Dimensions:	<i>Length: 2400mm; Width: 850mm; Height: 1460mm (with Guard).</i>
